Dimensions

Overall Width	78 inches (198 cm)
Height	50 inches (127 cm)
Bristle Height	8 inches (20 cm)

All specifications subject to change without notice or obligation

The Ventrac EF300 leaf plow is the fastest way to move deep layers of leaves. As the leaves pile up in the fall, they can often stack up faster than a blower can handle - this is where the Leaf Plow excels. This attachment is designed to save users hours and hours of painstaking leaf cleanup.

The Leaf Plow features a dual-stack of bristles allowing for a clean sweep without gouging the turf. With a height of 50" and a 78" overall width, this leaf plow collects a high volume of leaves in one pass. The flexible containment wings allow operation close to trees and other objects without worrying about damage to the property or the leaf plow. The Leaf Plow can mount on the front of the tractor for optimal visibility and maneuverability. It can also be mounted on the 3-point hitch at the rear of the tractor, allowing the use of a high-powered blower on the front PTO, making this the most efficient leaf removal combination ever.

STANDARD FEATURES

- 8" Dual Bristle Stack for Optimum Sweeping
- Trip-Free Design
- Expanded Steel Back for Visibility
- Adjustable Caster Wheels
- Replaceable Brushes
