Slope Rating	10°
Lift Capacity	700 lbs (318 kg)
Max Lift Height	52 inches (132 cm)
Dump Angle	36°

-All specifications subject to change without notice or obligation

-Tractor Compatibility – The KM500 is recommended for use on the 4520 tractors. Use of the KM100 Rock bucket and KM300 Log Grapple requires 3rd function hydraulics, which are only available for 4520 tractors. Accessories that don't require 3rd function hydraulics may be utilized on previous tractor models but performance will be reduced. See dealer for details.

LOADER (W/ STANDARD BUCKET) KM500

The Ventrac KM500 Loader has arrived, adding enhanced versatility for the landscape, hardscape, site work, and tree care industries. With easy operation and effortless installation, the KM500 Loader on the Ventrac 4520 is a dream combination that maximizes the capability of the tractor while serving as a loader and material mover. When combined with a dual-wheeled tractor, it becomes the most turf-friendly loader in the industry, allowing you to move quickly across turf without tracking the ground.

The four attachment options for the Loader add more versatility than ever before. The KM500 comes standard with a loader bucket for lifting, moving, transporting, and positioning any material it can scoop. And adding to the attachment capability line-up are the Rock Bucket with Grapple, the Log Grapple, and the Light Material Bucket.

ROCK BUCKET W/ GRAPPLE KM100

The Rock Bucket with Grapple has a versatile layout to transport anything from whole logs to loose debris. It will sift large rocks from dirt and surrounding material. The independent top grapples effectively trap odd-shaped materials, grasping the load with multiple clamping points for transport. The open structure offers excellent visibility of the bucket's contents. The Rock Bucket is great for removing rocks during new lawn installations, moving debris into a dump trailer, or shuttling material across complex properties.

LOG GRAPPLE KM300

The Log Grapple is a highly maneuverable way to transport whole logs. This time-saving capability means less log-cutting and fewer trips in and out of a work area. The log grapple allows users to place logs directly into a chipper or the back of a dump trailer with ease. In addition, the Log Grapple on the Ventrac Loader can secure whole logs, clusters of large branches, and material sized for the wood chipper, further speeding up tree work and job site clean-ups.

LIGHT MATERIAL BUCKET KM560

The Light Material Bucket is the highest capacity bucket in the Ventrac attachment line-up. Its 1/2 yard size allows for reduced trips, saving time and fuel consumption when hauling light materials. In addition, this bucket is a time-saver for mulch installs and moving, spreading, and leveling any loose materials. Find a multitude of jobs for this bucket by the scoopful from mulch, wood shavings, sawdust, animal bedding, yard waste, compost, and more.
